Makel Elektrik creates its Management System as to include design, production, sales, export, customs clearance, management and administrative activities of measuring electricity, control and distribution systems and equipment and lighting devices which are its major area of activity by considering internal/external factors and expectations of related parties. The scope of Makel's Management System includes Switches, Sockets, *Plugs*, Group Sockets, Cases, Circuit Breakers, Electronic Electricity Meters, Led Lighting, Slim Led Panels, Slim Led Downlights, Armature with Motion Sensors, *Led Projectors*, *Building Automation Systems*, Reactive Power Compensation Relays, Compensation Panels, Motor Protection Switches, Time Limit Relays, Modems.

Our Management System is created by integrating our Quality and Environment Management Systems;

- Our Quality Management System is created with the goal of providing products and services that meet the primary and secondary legislation provisions that are applicable and that meet the expectations of the customer by taking ISO 9001:2015 standard as reference. Moreover, depending on the scope of our activities, our Quality Management System is defined by taking directive/decisions, product safety and performance standards and conditions of legislations as basis. Within this context; primary regulations are as follows;
 - 2014/32/EU MID Directive,
 - 2014/35/EU LVD Directive and related local legislations
 - 2011/65/EU Rosh Directive and related local legislations
 - CE decision with no.768/2008/EC and related local legislations
 - 874/2012/EU and EU/1194/2012 Energy Labeling and Environment-Friendly Design regulations and related local legislations
 - TSE decisions
 - WELMEC guides,
- Our Environment Management System is created by taking ISO 14001:2015 standard as reference and by conducting our activities without threatening human and environment health and by meeting legal legislations with the usage of the most suitable resources. Moreover, our Environment Management System is defined by taking environmental dimensions that our Company could keep under control and affect as including/covering all processes and activities performed in facilities of Makel Elektrik in Esenyurt, Kır a .

Our Management System is created by taking tangible assets and corporate values, corporate information and culture of Makel as basis.

Our Company designed and carries out its management system as to be able to meet all articles of international management standards. There is no article that is left out of the scope within the standards of ISO 9001:2015 and ISO 14001:2015.
